Lesson 2 · Overtime and penalty rates Name: _____

Pay = base rate × multiplier × hours

Ella's café: weekday × 1 | Saturday (time and a half) × 1.5 | Sunday (double time) × 2 | public holiday (double time and a half) × 2.5

Show your working in each box.

Q1 Mia earns $24 per hour. This week she worked:

Day	Hours	Rate
Tuesday	5 h	normal
Saturday	6 h	time and a half
Monday (public holiday)	4 h	double time and a half

(a) Find Mia's hourly rate on each day.

(b) Find her total pay for the week.

Q2 Ali worked 6 hours on a Saturday at time and a half and was paid $243. What is Ali's base hourly rate?

Q3 Liam (base rate $26.44) works 3 hours of overtime on Thursday. Use the pay guide rule (first 2 hours at time and a half, after that double time) to find his overtime pay.

Extension Mia (base rate $24) is offered two ways to be paid for a 6-hour Saturday shift. Option A is time and a half. Option B is her normal rate plus a flat $50 bonus.

(a) Which option pays more, and by how much?

(b) For what length of shift would the $50 bonus pay more?
