Lesson 1 · Ways of earning money

Answers

Show your working in each box.

Q1 Leo works 15 hours at $23.50 per hour. What is his wage?

$23.50 × 15 = $352.50

Q2 A car salesperson earns 3% commission. She sells a car for $28,000. How much commission does she earn?

3% = 0.03

0.03 × $28,000 = $840

Q3 A fruit picker is paid $3.20 for each bucket of fruit and picks 85 buckets. How much does she earn?

$3.20 × 85 = $272

Q4 A musician earns a royalty of $0.004 each time her song is streamed. The song is streamed 250,000 times. How much does she earn?

$0.004 × 250,000 = $1,000

Q5 Jess (from Worked example 1) earned $820 this week, made up of her $400 retainer plus 5% commission. What were her sales?

Commission: $820 − $400 = $420

Sales: $420 ÷ 0.05 = $8,400

Check: 0.05 × $8,400 = $420, and $400 + $420 = $820

> Many Aboriginal art centres are owned and governed by Aboriginal people. When an artwork sells, most of the money goes to the artist, and a small part goes back to the art centre for its running costs and community programs (Desart, n.d.).

Extension An art centre sells a painting for $1,800 and keeps 25% commission. How much does the artist receive?

The centre keeps 0.25 × $1,800 = $450

The artist receives $1,800 − $450 = $1,350

(or 75% goes to the artist: 0.75 × $1,800 = $1,350)
